This presentation contains “forward-looking statements” as that term is defined in the Private Securities Litigation Reform Act of 1995. Forward-looking statements include, without limitation, any statement that may predict, forecast, indicate or imply future results, performance or achievements, and may contain words such as “believe,” “anticipate,” “expect,” “estimate,” “intend,” “project,” “plan,” or words or phrases with similar meaning. Forward-looking statements should not be read as a guarantee of future performance or results, and will not necessarily be accurate indications of the times at, or by, which such performance or results will be achieved. Forward-looking statements are based on current expectations, forecasts and assumptions that involve risks and uncertainties, including, but not limited to, economic, competitive, governmental and technological factors outside of our control, that may cause our business, strategy or actual results to differ materially from the forward-looking statements. We do not intend, and undertake no obligation, to update any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required by applicable law. Investors are referred to the Company’s filings with the Securities and Exchange Commission, including its Annual Report on Form 10-K and its Quarterly Reports on Form 10-Q for additional information regarding the risks and uncertainties that may cause actual results to differ materially from those expressed in any forward-looking statement.

In addition to results under GAAP, this presentation contains certain non-GAAP financial measures, including EBITDA and adjusted EBITDA, which are provided as supplemental measures of financial performance. EBITDA and Adjusted EBITDA are presented because they are important metrics used by management as one of the means by which it assesses financial performance. EBITDA and Adjusted EBITDA are also frequently used by analysts, investors and other interested parties to evaluate companies in our industry. These measures, when used in conjunction with related GAAP financial measures, provide investors with an additional financial analytical framework that may be useful in assessing our company and its results of operations. EBITDA and Adjusted EBITDA have certain limitations, which are discussed in greater detail in the Company’s filings with the Securities and Exchange Commission, and should not be considered as alternatives to net income, or any other measures of financial performance derived in accordance with GAAP. Other companies, including other companies in our industry, may not use such measures or may calculate one or more of the measures differently than we do, limiting their usefulness as a comparative measure. A reconciliation of these non-GAAP measures to the most directly comparable GAAP measure is set forth in the appendix to this presentation.
